

WORDS

ENABLE EVERYONE IN YOUR ORGANISATION TO FEEL VALUED AND RESPECTED

We know from research that inclusive cultures are high performance cultures – they deliver greater performance and productivity. How we speak to and about each other influences how we treat each other, and so it also builds our workplace culture.

Language is a powerful tool for building inclusion or exclusion at work – it allows people to feel valued, respected and one of the team (included) or under-valued, disrespected and an “outsider” (excluded).

This interactive and evidence based knowledge program utilises DCA’s latest research findings across Age, Cultural, Disability, Gender, Indigenous and LGBTi+ diversity dimensions and equips participants with the skills, knowledge and resources to be more inclusive at work and beyond.
