

# Cultural diversity training

**We live in a vibrant multicultural nation, with one in four Australians born overseas and over 400 languages spoken. This diversity can bring many benefits to an organisation but this can only be realized when we act to build inclusion, such as growing self-awareness, cultural humility and openness to and valuing of difference.**

SSI Diversity Training provides learning experiences that transform how people respond to diversity in ways that are thought provoking, inspire curiosity, and build confidence to engage with cultural diversity.

As part of RISE we are offering participating organisations the opportunity to book in our ‘Working inclusively in a culturally diverse workplace’ workshop.

This interactive and reflective workshop builds capability and confidence to work within culturally diverse teams. Content can include:

- Defining diversity and inclusion
- A framework for working inclusively
- Unpacking ‘culture’ and finding the common ground to work collaboratively
- Managing unconscious bias
- Personal identity and diversity within diversity
- Intersectionality and addressing disadvantage
- Minimising misunderstanding through examining explanatory models

Delivery can be in-person or virtual and content and length can be customised to your organisational needs.
